

Data for the updated indicators listed below have been added to the [Productive Healthy Ageing Profile](#) data tool as part of the February 2021 update. These are provided by local authority (LA) and/or by clinical commissioning group (CCG) as indicated and at aggregated levels based on these. Note that there are some anomalies regarding which year versions of geographies are available. Further details regarding the geographies and inequality breakdowns that can be selected in the Profile are provided [here](#).

Domain & Indicator name	LA	CCG	Time period added	Further comments
<b>Domain1: Optimise Health &amp; Reduce Risks Early</b>				
Life expectancy at birth, split male/female	✓		2017-19	Update of the 'LSOA11 deprivation deciles within area (IMD trend)' showing variation in life expectancy between the tenth least and tenth most deprived 'lower super output areas' (small geographies). The latest years and trend charts are provided via the Inequality view. This is available at local, regional and national level and is based on 3 combined years data.
Life expectancy at 65, split male/female	✓		2017-19	Update of the 'LSOA11 deprivation deciles within area (IMD trend)' as above
Inequality in life expectancy at 65	✓		2017-19	How much life expectancy varies with deprivation at LSOA (small area) level – summarised at local, regional and national level. This is provided via all relevant views in the tool and is based on 3 combined years data.

Smoking prevalence in adults (18+) - current smokers (APS)	✓		2019	Smoking populations have been updated using 2019 mid-year population estimates published by ONS. The Inequality view provides a national breakdown by 5-year age bands up to 90+, plus other types of inequality breakdowns.
